## SUMMARY

Data Science undergraduate at Telkom University with proven organizational and internship track record. Experienced in creative problem solving, cross-functional stakeholder management, workflows automation, and data analytics project development.

## EDUCATION

**Telkom University | B.Sc. Data Science** **September 2023 - Present**

**Area of Interest:** Data Warehouse, Data Analytics, Big Data, Machine Learning, Time Series Analysis.

**Honors:** Astra 1st 2026 Scholarship Awardee, Telkom University Endowment Fund 2026 Awardee

**SMK Telkom Purwokerto | Software Engineering** **November 2020 - May 2023**

**Area of Interest:** Database Management, UI/UX Design, Web Development, Object-Oriented Programming.

## EXPERIENCE

### AI Engineer Intern | Rey.id

**October 2026 - Present**

- Built a Python evaluation harness (Jupyter, pydantic-ai) for LLM-based diagnosis extraction from handwritten medical documents and optimized extraction instructions, improving diagnosis-name accuracy by 40% points with zero regressions.
- Benchmarked 9 LLM configurations (Gemini, GPT, Claude) through a LiteLLM gateway on accuracy, cost, and latency to guide model selection for production extraction.
- Engineered hospital-specific extraction prompts for itemized medical bills across 18 hospitals, validated with pytest and Dockerized pipeline runs, achieving 100% line-item accuracy (up from as low as 0%).

### Project Consultant | PT. Astra International - Honda Sales Operation (Astra Motor)

**June 2026 - November 2026**

- Led end-to-end development of the Digital Library for Astra Motor Human Capital (HC), building a Django REST API and a 16-entity PostgreSQL schema (22 migrations) for role-based access, learning programs, progress tracking, approval workflows, and audit logs.
- Automated delivery with a GitHub Actions CI/CD pipeline (~660 backend tests, frontend tests, and production build checks on every merge) and a one-step production deploy with health checks and automatic rollback.
- Managed the backlog and sprints in Jira, aligned requirements and release scope with HC stakeholders, and ran user acceptance testing (92 test cases across 10 modules) plus a System Usability Scale survey to turn feedback into prioritized fixes.

### Product Development Intern | EON Reality

**January 2026 - April 2026**

- Engineered the **EON Orchestrator**, a retrieval-augmented generation (RAG) application using Python, FastAPI, and PostgreSQL to support business proposal workflows, email outreach drafting, and presentation generation.
- Developed a vocational training startup proposal for the Learn for Life initiative, aligning EON-XR solutions with Indonesian workforce skills needs.
- Evaluated no-code application builders against cost, developer workflow, UI/UX capabilities, and file-export requirements to inform tool selection.

### Tutor of Indonesian Language for Foreign Speakers (BIPA) | Telkom University Language Center

**May 2025 - Jan 2026**

- Taught Indonesian to foreign speakers at Debutant (A1) and Pre-Intermediate (A2) levels through the BIPA program, a collaboration between Telkom University and the Atdikbud KBRI Paris.
- Work with KNB (Kemitraan Negara Berkembang) and TIAS (The Indonesian Aid Scholarship) awardees through offline sessions at Telkom University, helping them strengthen their Indonesian language skills during their studies.
- Offer personalized, constructive feedback to help students from diverse backgrounds enhance their Indonesian communication skills in both academic and everyday settings.

## ORGANIZATIONS

**Director of Multimedia | SRE Telkom University** **December 2024 - December 2025**

- Rebuilt SRE's digital presence from scratch, directing Social Media & Creative Media teams to establish a unified visual branding and design guidelines.
- Drove **83% follower growth (1.8K to 3.3K)** by analyzing engagement patterns and aligning content output with what the data showed the audience actually responded to.
- Implemented performance tracking system using Notion and Google Sheets for cross-divisional scheduling & content visibility, the result was improved workflows and visibility of content KPIs and deadlines.

**Creative & Information Content Manager | IEEE Telkom University** **January 2025 - January 2026**

- Produced visual explainers for the IEEE Louds series on topics like Neuromorphic Computing, Quantum Computing, and IoT, making research-level content accessible through modular design.
- Created content schedule/planner with Notion and script templates, speeding up the content production workflow.

**Social Media Manager | SRE Telkom University** **December 2023 - December 2024**

- Managed the social media team in creating social media content to promote renewable energy awareness.
- Worked for National Energy, Climate, and Sustainability Competition event **Green Impact Days 2024**, contributed to various design & media tasks.
- Led the Publication & Documentation division for **SREssay 2024**, an annual national essay competition and directed the team in designing all promotional content, from registration campaigns to winner showcases.

## PROJECTS

**Indonesia Electrical Machinery Supply Analytics** **April 2026 - May 2026**

**Link:** *https://github.com/cerealtwist/Comtrade-Performance-Analytics*

- **Built a 3-stage ETL pipeline,** pulling a decade of monthly trade data from the UN Comtrade API and World Bank LPI, covering 11 trading partners across 10 years.
- **Diagnosed a structural trade deficit with China** that grew 137.7% from 2015 to 2024, while confirming Indonesia as a net exporter to the US averaging $1.62B annual surplus.
- **Found Indonesia's LPI ranking fell from 46th to 61st** as every ASEAN peer improved, pinpointing customs efficiency at 2.8/5.0 as the critical logistics bottleneck.
- **Delivered a 5-dashboard Tableau workbook** covering trade overview, demand volatility, COVID-19 shock, logistics correlation, and the 2024 AI hardware demand surge (+120.87% YoY for HS85)

**Tools**: Python, Pandas, Scipy, Tableau

**Techniques**: ETL Pipeline, Time Series Feature Engineering, Python Automation, Data Visualization

## CERTIFICATION

**TOEIC Listening and Reading Test | The TOIEC Program** **September 2024**

- TOEIC Listening and Reading Test with total score of 900/990 (475 in Listening & 425 in Reading)

**Data Science in Retail: Market Basket Analysis | DQLab** **July 2023**

- Gained experience applying Market Basket Analysis techniques to retail datasets.

## SKILLS

**Tools:** GCP, BigQuery, Figma, Excel, PowerBI, Tableau, Jupyter Notebook, Google Colab, Notion, Trello

**Expertise:** SQL, Python, PostgreSQL, R, Java, Javascript, LangChain, Keras, Tensorflow
